

# Brilliant

.....designed for harsh conditions

## Bowen Series

A range of sloping roof enclosures designed to meet the demands of mining environments.

- Perfect for harsh environments where increased mechanical protection is required.
- Typical applications are housing terminations, pushbuttons, isolators or switchgear in industrial or demanding environments including washeries, processing and sampling stations.
- Well suited to applications that require front and side mounted equipment.
- 40° sloping roof and 40mm roof overhang for reduced material build-up to ensure maximum equipment protection.
- Easy installation with top and bottom mounting flanges.
- Lifting lugs (800mm & 1200mm high only).
- Available with varying body/door thickness.
- Manufactured from 1.5mm / 2.0mm thick 316 stainless steel.
